Digital Video Creator™ 150 Hi-Speed Hi-Speed USB 2.0 Video Editing System

The Dazzle Digital Video Creator™ 150 (DVC 150) is the ultimate solution for creating movies from your home videos.

The DVC 150 captures DVD-quality video from any camcorder, VCR or TV. The DVC 150 has a Hi-Speed USB 2.0 interface to the computer which means if your computer supports USB 2.0, you will get even higher video quality. Use Dazzle MovieStar™ 5 software to cut out unwanted scenes, add 3D transitions, titles and special effects. Then use Dazzle DVD Complete™ software to design and burn interactive DVDs. Don't want to make DVDs yet? The DVC 150 also lets you make video tapes, video CDs, S-Video CDs or webcast video across the Internet.

Key Features

Hi-Speed USB 2.0 Interface

The DVC 150 has a Hi-Speed USB 2.0 interface to the computer. This interface is about 40 times as fast as a USB 1.1 interface which means if your computer supports USB 2.0, you can get even better quality video. If you have a USB 1.1 connection, don't worry, you can still use the DVC 150 and it will be ready for the future when you upgrade your computer.

Capture DVD Quality Video

Connect your camcorder, VCR or TV to the Dazzle DVC 150 to capture DVD quality video to your PC. All you need to do is connect your video source to the Dazzle DVC 150 connector box and press the video record button in the Dazzle MovieStar 5 software.

DVD Encoder Chip Saves Time and Space

The DVC 150 has a DVD encoder chip inside which automatically converts video in real time into DVD format before it lands on your hard disk. This shrinks the video to about 1/4th its original size while keeping DVD quality. You not only save a lot of hard disk space but since your video is in the DVD format already, you do not need to convert the video later which can take between 4 and 10 hours per one hour video.

Easy but Powerful Video Editing

Dazzle MovieStar 5 makes editing your video easy, but it doesn't leave out the powerful features you want. Cut out unwanted scenes and add 3D transitions, titles and special effects. Add your favorite background music to set the mood or do a voice-over narration to explain important scenes. Use the storyboard or timeline interface for easy, yet professional video editing. MovieStar 5 has Background Rendering, Smart Rendering and Fast Rendering technology for superior speed and performance.

Real fun ...

Our software suite offers the right tools for current, most interesting applications for video editing and multimedia:

- Dazzle MovieStar™ makes editing your video easy, but it doesn't leave out the powerful features you want.
- Dazzle DVD Complete™ guides you through five simple steps to go from camcorder to DVD.
- With Dazzle OnDVD™, you can take your digital pictures and turn them into photo albums for your DVD player.
- Share your videos with all friends and family at Dazzle Webcast Theater in the internet

Dazzle® MovieStar™ 5

Easy but Powerful Video Editing

Dazzle MovieStar 5 makes capturing, editing and sharing your video easy, but it doesn't leave out the powerful features you want. Cut out unwanted scenes, add 3D titles, transitions, background music, voice-over narrations and special effects. With MovieStar 5's custom video codecs, you always get the best video quality possible.

MovieStar 5

Dazzle® DVD Complete™

DVD Authoring and Burning Software

With DVD Complete™, it's easy to make DVDs like the ones designed in Hollywood movie studios. DVD Complete's project wizard guides you through the five simple steps to go from camcorder to DVD. All you need to know is what you like and DVD Complete will do the rest.

Dazzle® OnDVD™

Digital Photo Album Creation Software

Take your digital pictures and turn them into photo albums! Use OnDVD to create digital photo albums to be played on your DVD player. Favourite photos can easily be turned into photographic prints for years of display. OnDVD makes it easy to turn digital memories into home entertainment!

Output Movies and Slideshows

Output to Tape

After you edit your movies, record them back to video tape to watch on your VCR or camcorder.

Burn CDs and DVDs

Make DVDs, Video CDs, S-Video CDs or backup CDs with all your video footage and digital slideshows. CD/DVD burner required.
